Inspection Report

Summer Wind Farm Sanctuary
6490 Mowerson Rd
Brown City, MI 48416

Customer ID: **6902**
Certificate: **34-C-0227**
Site: 001
SUMMER WIND FARMS

Type: ROUTINE INSPECTION
Date: Jan-29-2014

3.125 (c) **REPEAT**

FACILITIES, GENERAL.

The produce cooler contains moldy tomatoes and black and spoiled pears which were very soft and oozing fluid. The pears were stored on a rack directly above a box of oranges. The tomatoes were stored in a box containing other produce. Spoiled produce must be removed promptly to prevent contamination of food intended to be fed to the animals. Sort and remove spoiled produce promptly.

3.127 (b) **REPEAT DIRECT NCI**

FACILITIES, OUTDOOR.

The shelter housing the grizzly bear contained no bedding. The president stated that they had provided bedding last Fall. The temperature at the time of inspection was about 12 degrees with a very strong wind. The temperatures at night have been below zero degrees and the low for tonight was expected to be 9 degrees. Bedding must be provided to this animal to provide for its health and comfort. Provide bedding for this animal.

3.131 (d)

SANITATION.

There was rodent feces present on a shelf in the produce cooler. Mice can be carriers of disease and can contaminate the produce stored in this area with their feces or by tracking fecal material from animal enclosures or other contaminates into the produce cooler. A safe and effective means of controlling pests must be established for the produce cooler and the entire facility. Establish a plan that eliminates mice from the produce cooler.

Correct by: 2-7-14.

There have been no animal deaths since the time of the last inspection in which the facility was cited under 2.40(b)(2).
